

Folding Pallet Containers – Space Saving Distribution

Foldaway Pallet Containers meet today's demands for resource and cost saving distribution. The FLC foldaway container increases transport capacity, product integrity and gives good access in assembly lines. It also improves hygiene and working conditions. Unlike its metal equivalents, the FLC container is extremely quiet to use. The FLC Container is fully recyclable. All components are individually replaceable.

- Saves 60% when folded
- 4-way-entry pallet base, suitable for fork lift trucks and hand pallet trucks
- Spring-loaded "autolock" enables one person to fold an empty container
- Odette-sized label holders can be fitted on two sides
- Constant low tare weight – 62kg
- Secure, waterproof, overlapping lid
- Reinforced channel for drain tap
